

Kensington Valley Baseball and Softball Association League Structure & Scheduling Cheat Sheet

In order to ensure age groups are structured in a manner that provides a sufficient and equal number of games to be played within each division, the following structures have been identified for groups ranging from 5 teams to 30 teams.

How to read these guidelines:

- Teams = Identifies the number of teams in a league. For example, if U10 Community has 20 teams go to the lines for 20 teams.
- Divisions = Number of divisions and the teams per division. A division must consist of a minimum of 5 teams with a couple exceptions listed in the table.
- With or Without Crossover = For multiple divisions, indicates whether teams in one division will play games against teams in other divisions. Note that whenever possible, opt for the crossover option to increase the number of different teams played.
- Schedule = Identifies how many games against each opponent within the group will play. **Teams within a division must play the same number of games against the same opponents.**
- Games = Number of games that will be scheduled based on the scenario. If there is only one number in this column, all teams will play that number of games. If there are two numbers, the first number is the games for the division with the fewest teams and the second number is the games for the division with the most teams. If it states "Multiple", it means there are several potential values and you should refer to the other breakouts for the numbers. Ideally, look for options which provide 17 – 20 games. Less than 17 should only be selected for groups that get started later in the season. More than 20 should be avoided with 22 being considered the most any group should look to schedule. Schedule options that result in more than 22 games are not listed.
